Detailed feedback on your submission of assessment 1 in COMP 213

Thank you for submitting your assessment. Your efforts are highly appreciated!
The grades for each of 5 categories are best / great / good / ok / poor. Hopefully
the detailed comments below will help you submit a better assessment next time.

Assessed features with some examples	grade	comments : what can be improved
Program structure and compilation, e.g. compiling without warnings or notes, easy to understand the game rules.	best	
The game logic is implemented, e.g. at least two types of players, a winner is correctly selected.	great	When asking a human to choose an attribute , show their top card with values 人性化设计，让用户知道自己的优势, otherwise it's a random guess.
The code has Javadoc comments, e.g. all classes and methods are explained, every Java class in a separate file.	great	could describe many private/ protected fields in the class Game.
Java object-oriented features, e.g. structures based on List, Map, Deque, inheritance, interfaces, polymorphism.	best	
Advanced features of the game, e.g. more types of players like smart AI nice presentation, user-friendly etc.	best
